

BEFORE THE UNITED STATES
NUCLEAR REGULATORY COMMISSION

In the matter of)
NEW YORK POWER AUTHORITY) Docket No. 50-333
James A. FitzPatrick Nuclear Power Plant)

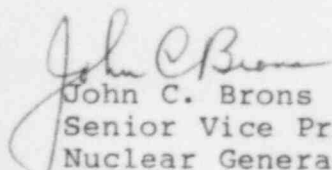

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, the New York Power Authority, as holder of Facility Operating License No. DPR-59, hereby applies for an Amendment to the Technical Specifications contained in Appendix A of this license.

The proposed change to the James A. FitzPatrick Technical Specifications seeks to amend a certain portion of Section 3.9.A.3 (page 217) of Appendix A to the Operating License. The change would delete the requirement to disconnect an emergency bus from the normal power source and connect it to the reserve power source, when its associated Emergency Diesel Generator system is inoperable.

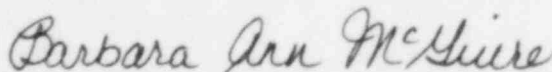

The proposed changes to the Technical Specifications are presented in Attachment I to this Application. The Safety Evaluation is included in Attachment II.
