Mr. Oliver D. Kingsley, Jr.
Vice President, Nuclear Operations
Mississippi Power & Light Company
P.O. Box 23054
Jackson, Mississippi 39205

Dear Mr. Kingsley:

SUBJECT: GRAND GULF UNIT 1, PROCESS CONTROL PROGRAM (PCP) REVISION 1

By letter dated August 31, 1984, Mississippi Power & Light Company transmitted as Attachment II a revised reference document entitled, "Process Control Program Description, Revision 1," dated February 1984, for Grand Gulf Nuclear Station, Unit 1. Revision 1 to the PCP addresses requirements in 10 CFR 61, dewatering, and controls to ensure a contractor performs solidification/dewatering, services properly.

The NRC staff has reviewed this submittal and finds that Revision 1 to the PCP complies with current NRC criteria and, therefore, is acceptable on an interim basis for use with Grand Gulf Technical Specification 6.13. A copy of the staff's safety evaluation is enclosed. Attachment 1 to the safety evaluation is a request for additional information which should be addressed within six months of the date of this letter.

The acceptability of Revision 1 to the PCP is based on currently available NRC guidelines, but a future revision should address full compliance with 10 CFR 61 when revised guidance becomes available from the NRC. This guidance is scheduled for development in 1987.

Sincerely,

Original Signed by

Walter R. Butler, Director
BWR Project Directorate No. 4
Division of BWR Licensing
