Gentlemen,

Having been involved in the design of new commercial and industrial building, I am aware of the increasing demand for electrical energy in New England.

Three times within the past year, the normal sources of electricity have failed to meet the demand, and the demand is constantly growing.

We are told that experts agree low power testing poses no threat to the public outside the plant.

Now that the Seabrook station is in place and equipped you are urged to permit low power testing so that the

"bugs" and "glitches" inherent in such a new and intricate system may be overcome prior to the time the station is called upon to help meet the ever growing demand.

Very truly yours,
Wilbur R. Barnes.
