OFFICE OF THE SECRETARY  
DOCKETING & SERVICE  
BRANCH

Secretary of the Commission  
Attn: Docketing and Service Branch  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Secretary,

I personally desire that the Sealbrook Nuclear Power Station be brought on line, at full power, as soon as possible.

I believe your ruling that off-site emergency sirens need not be in place when low power tests take place is truly reasonable and appropriate.

I also wish that all negative thinking and acting Nuclear Power obstructionists, especially our elected politicians, would use their energies constructively and not destructively.

Every new or worthwhile improvement or invention or process has some risks associated with it and I would prefer to face the risks associated with nuclear power versus stagnation or regression back to the dark ages.

Sincerely yours

Francis R. Doherty
