PROPOSED RULE 205

Secretary of the Commission  
Attn: Docketing and Service Branch  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear NRC Secretary:

As native New Englanders who continue to spend our summers in the Vermont/New Hampshire area we are greatly concerned by the unreasonable delay in activating the Seabrook Plant. We are in complete agreement with the proposed "clarification of emergency planning requirements for low-power licenses" as the next step in the program to activate the Seabrook Plant.

We urge the NRC to move forward and approve this proposal to speed the licensing of this sorely needed facility.

Sincerely,

Mary L. McGovern
