OFFICE OF  
DOCKETING & SERVICE  
BRANCH

Sec'y of the Commission Docketing & Service Branch  
U.S. Nuclear Regulatory Commission, Washington DC 20555

Dear Secretary: 1 Jun 88 ref:nuke.6a8

I am writing to support the immediate low power operation of the Seabrook Station. I believe the installation of emergency sirens are completely unnecessary for this testing to be performed.

Please let's get the U S Nuclear Power Program moving again. Compliments to you for so thoroughly considering even the most trivial opposition of Nuclear Power.

Now it's time to get our Nuclear electric generating stations operating and making our U S power stations a showplace for the rest of the world.

I believe it's a National disgrace to see Stations such as Seabrook and Shoreham idle and not utilized.

I am a registered professional engineer and I have studied the Nuclear Energy issues carefully. I urge you to advance with a policy and program that empowers these finished Stations to get up and running.

Sincerely yours,  
Paul R. Beswick Mass Reg Prof Eng 11822
