June 2, 1988 OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

Secretary of Commission  
Attn: Docketing and Service Branch  
U.S. Nuclear Regulatory Commission  
Washington, D.C.

Dear Sir:

I write from the stand point of a senior citizen who lives within a fifty mile radius of a Nuclear Power Plant and one who wishes there were more of them.

Our now polluted atmosphere needs all the relief it can get from its present overload of sulfur and nitrogen compounds. Every kilowatt of electricity used that has been generated by nuclear power means less pollution of our atmosphere. Withholding consent to the low level testing of Seabrook seems to me to be not in the best interest of our country. I urge you to adopt the new rule that permits low power testing of new Nuclear Power Plants.

Sincerely,

*Charles G. Stewart*
