OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Secretary of the Commission
Attention - Docketing and Service Branch
US Nuclear Regulatory Commission
Washington, DC 20555

Gentlemen,

RE : New rule that will clarify the requirements for low-testing
of nuclear power plants.

It is my opinion that working sirens do not need to be in place
for this low-testing procedure.

I am concerned over the many delays in the start-up of Seabrook,
and I respectfully urge your body to proceed with all reasonable
speed to get the plant into operation rapidly.

Cordially yours,

E. Dexter Davis
