OFFICE OF REGULATORY
DOCKETING & SERVICE
BRANCH

202-353 Foothill Ave

Hollis, NY 11423 May 25

Dear Ms Mudge:

I wish to take this opportunity to applaud your decision to clarify the rules regarding the granting of a low power listing of the Seabrook Station nuclear facility.

It is inconceivable that a small minority can try to impose their will on a facility that is so critically needed in New-England. From what I have read it is the safest nuclear ever built.

I wish to add my name to those who are urging you to grant this license which is in best interests of the nation and especially to needs of New-England.

Thank you for giving this your immediate attention.

Martin Welner
