6/1/88

Secretary of the Commission
Attn: Docketing and Service Branch
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

I am writing to express my support and approval of the proposed "clarification of emergency planning requirements for low-power licenses." Off-site screens are not necessary during such a low power test because no danger is posed to the public outside the plant.

The England needs the energy or we will cripple our economy. Seabrook is designed to be far safer than Chernobyl. Far more people will die from coal-mining and oil exploration than nuclear plants in the U.S. this year. Finally, it's built and ready to go. Let's fire it up and rely more on American ingenuity for our energy than Canadian or Iranian sources.

Sincerely,
John R. Sewell
