Dear Mr. Shelton:

SUBJECT: INSTRUMENTED INSPECTION TECHNIQUE USAGE

By letters dated April 11, 1988 (Serial No. 1486) and September 8, 1988 (Serial No. 1582), Toledo Edison Company submitted information and drawings concerning the use of the Instrumented Inspection Technique (IIT) during pressure tests at the Davis-Besse Nuclear Power Station, Unit No. 1. The letters and attachment identify the systems on which the IIT will be applied and provide a discussion of the methodology to be used.

The staff has reviewed the information contained in the subject letters and finds the application of the IIT at the Davis-Besse Station represents an acceptable alternative testing method as discussed in the topical report on the IIT that was evaluated and approved by letter dated November 7, 1985.

Sincerely,

151

Albert W. De Agazio, Sr. Project Manager
Project Directorate III-3 Division of
Reactor Projects - III, IV, V & Special
Projects
