Reference: Letter dated June 18, 1988, from B. D. Withers, WCNOG,  
to Document Control Desk, NRC  
Subject: Docket No. 50-482: Date for Next Revision of the  
Emergency Operating Procedures

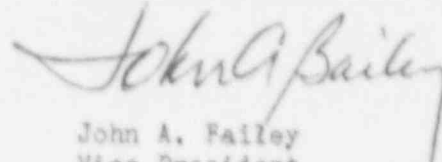

Gentlemen:

The purpose of this letter is to document a conversation between Mr. G. D. Boyer of Wolf Creek Nuclear Operating Corporation and Mr. D. D. Chamberlain of the NRC Region IV staff on September 30, 1988. The discussion concerned a change in the completion date, as stated in the Reference, for Revision 2 of the Emergency Operating Procedures. Because of the number of changes being made and the number of NRC comments made during the Emergency Operating Procedure (EOP) Inspection, the new completion date of Revision 2, along with the required procedure training, is scheduled for March 30, 1989.

The current status of the EOP revision effort is that the 43 Emergency Operating Procedures have had changes made to them and they are in final draft form. In addition, the procedures have been verified and validated as required by the procedures generation package. The remaining actions are to perform a final review of the procedures and conduct training on all of the procedures for the operators.

If you have any questions concerning this matter, please contact me or Mr. O. L. Maynard of my staff.

Very truly yours,

John A. Bailey  
Vice President  
Engineering and Technical Services
