Reference: Oregon State University TRIGA Reactor (OSTR),  
Docket No. 50-243, License No. R-106

In accordance with section 6.7.e of the OSTR Technical Specifications, I am hereby submitting the Annual Report of the Oregon State University Radiation Center and TRIGA Reactor for the period July 1, 1997 through June 30, 1998.

The 1997-98 annual report continues the pattern established over the past few years and includes information about the entire Radiation Center rather than concentrating primarily on the reactor. Because the report addresses a number of different interests, it is rather lengthy, but we have incorporated a short executive summary which highlights the Center's activities and accomplishments over the past year.

A reading of the executive summary will soon communicate the fact that the Radiation Center has continued to provide significant services to a wide variety of users. I hope that you will find the current report to be informative and interesting. Should there be any questions, please let me know.

Cordially,

  
Stephen E. Binney  
Director
