Dr. Donald L. Warner
Post Office Box 781
Rolla, Missouri 65401

Dear Dr. Warner:

This refers to our telephone conversation today regarding the proposal from Wyoming Mineral Corporation to conduct in-situ leaching studies for the purpose of extracting uranium from sandstone host deposits at several locations in Wyoming and South Dakota.

I have enclosed the applicant's proposal for your reference. I would like you to review the provisions described by the applicant in performing the tests proposed. In particular, your comments are requested with respect to the adequacy of the provisions described by the applicant to provide adequate control of their proposed activities, also comments relative to provisions for minimizing the communication of the leach solutions with the biosphere.

I appreciate your agreeing to review this material promptly.

Sincerely,

Richard B. Chitwood, Chief
Technical Support Branch
Directorate of Licensing
