Mr. Thomas E. Murley, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Byron Station Units 1 and 2  
Braidwood Station Units 1 and 2  
Application for Amendment to Facility  
Operating Licenses NPF-37, NPF-66,  
NPF-72 and NPF-75  
NRC Docket Nos. 50-454/455 and 50-456/457

Dear Mr. Murley:

Pursuant to 10 CFR 50.90, Commonwealth Edison proposes to amend Appendix A, Technical Specifications of Facility Operating Licenses NPF-37, NPF-66, NPF-72 and NPF-75. The proposed amendment request revises Specification 4.6.1.3a to be consistent with NUREG-0452 draft Revision 5, "Standard Technical Specifications for Westinghouse Pressurized Water Reactors". The second change reflects the installation of an automatic leakage rate detection system to provide continuous pressure testing of the containment air lock door seal gaskets.

The revised Technical Specification pages are contained in Attachment A. The description and summary of the proposed changes are presented in Attachment B.

The proposed changes have been reviewed and approved by both on-site and off-site review in accordance with Commonwealth Edison procedures. Commonwealth Edison has reviewed this proposed amendment in accordance with 10 CFR 50.92(c) and has determined that no significant hazards consideration exists. This evaluation is documented in Attachment C.

Commonwealth Edison is notifying the State of Illinois of our application for this amendment by transmitting a copy of this letter and its attachments to the designated State Official.
