

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

November 3, 1998

Mr. Lou Liberatori, Chairman
Westinghouse Owners Group Steering Committee
Indian Point Unit 2
Broadway & Bleakley Ave.
Buchanan, NY 10511

SUBJECT: REVISED PAGE 9 OF THE SAFETY EVALUATION RELATED TO TOPICAL
REPORT WCAP-14036, REVISION 1, "ELIMINATION OF PERIODIC
PROTECTION CHANNEL RESPONSE TIME TESTS" (TAC NO. MA0863)

The NRC staff forwarded to you, on October 5, 1998, the safety evaluation report on the subject topical report, submitted by the Westinghouse Owners Group (WOG) by letter dated January 22, 1998. After a telephone conversation with members of the WOG, the staff prepared the attached modified page 9 of the report, correcting typographical errors made in the original report concerning the components covered by the Solid State Protection System in the topical report.

This modification does not change the conclusion reached in the SER, nor does it change the logic used to reach those conclusions. The only change is to the list of components within the Solid State Protection System.

Please replace the current page 9 in the SER with the modified page 9.

Should you have any questions or wish further clarification, please call me at (301) 415-2919, or Paul Loeser at (301) 415-2825.

Sincerely,

Thomas H. Essig, Acting Chief
Generic Issues and Environmental Branch
Division of Reactor Program Management
Office of Nuclear Reactor Regulation
