Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: LaSalle County Station Units 1 and 2
Updated FSAR (UFSAR) Facility
Operating Licenses NPF-11 and NPF-18
NRC Docket Nos. 50-373 and 50-374

- References (a): December 15, 1980 letter from D. G. Eisenhut
to All Licensees.
- (b): March 27, 1985, letter from D. L. Farrar
to H. R. Denton.
- (c): June 15, 1984 letter from L. O. DelGeorge
to H. R. Denton.

Dear Mr. Denton:

In accordance with the requirements of 10 CFR 50.71(e), Commonwealth Edison hereby submits Revision 2 to the Updated Final Safety Analysis Report (UFSAR) for our LaSalle County Station. Units 1 and 2 have a common FSAR and, therefore, this revision contains information for both units.

The UFSAR has been prepared in accordance with guidance approved by the May 9, 1980, Federal Register Notice and Reference (a). Consistent with that guidance, this UFSAR revision has been retained in the original FSAR's format or content to conform with the recommendations contained in Regulatory Guide 1.70.

Commonwealth Edison has made every effort to identify all relevant information for this revision including modifications to the facility as described in the UFSAR that have been made since the last submittal (Reference (b)). In our judgment, the UFSAR accurately reflects the as-built condition of the plant as of October 17, 1985. All changes requiring NRC approval have been reviewed by the NRC and all others have 50.59 reviews on site to document the stations's determination that prior approval was not required. In accordance with Reference (c), the UFSAR will be used to perform future 10 CFR 50.59 reviews.

1/13

April 15, 1986

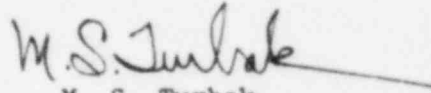

In accordance with the regulations, future revisions to the UFSAR will continue to be provided on an annual basis.

To the best of my knowledge and belief the statements contained in the UFSAR are true and correct. In some respects these statements are not based on my personal knowledge but upon information furnished by other Commonwealth Edison employees. Such information has been reviewed in accordance with Company practice and I believe it to be reliable.

In accordance with the requirements of 10 CFR 50.71(e), one signed original and twelve (12) additional copies of the UFSAR revisions are provided. Also attached is an "Index of Changes" which explains which pages of the UFSAR must be removed and which revised pages must be inserted.

Please direct any questions you may have regarding this matter to this office.

Very truly yours,

M. S. Turbak
Operating Plant Licensing Director

After you have completed changes to Volume XII, remove all drawings from Volume XII and insert them after the drawings in Volume XI. This empty Volume will now become Volume IV-A to handle the increase of size of Table's in Chapter 3. Just insert the new binder Volume Labels (enclosed) in Volume IV, IV-A & V as appropriate, to correctly label these Volumes for this new Revision.
