OCT - 5 1988

Arkansas Power & Light Company
ATTN: Mr. Gene Campbell
Vice President, Nuclear
Operations
P.O. Box 551
Little Rock, Arkansas 72203

Gentlemen:

This is to advise you of a maintenance team inspection that has been scheduled at the Arkansas Nuclear One, Units 1 & 2 site during the weeks of November 14, 1988, and November 28, 1988.

As part of the preparation for this inspection, we desire to hold a one to two day meeting with members of your staff at the Arkansas Nuclear One site during the week of October 17, 1988. During this meeting the scope of the inspection will be presented.

The team leader for this inspection is Mr. Dennis L. Kelley, who will be our principle contact for this inspection. The inspection team will consist of two Region IV reactor inspectors (Messrs. Robert Vickery and Perry Stewart), a Region IV radiation specialist (Mr. Ronald Baer), a Region IV resident inspector (Mr. Tom Staker), a Region IV project inspector (Mr. Arthur Howell), and two NRC Headquarters engineering specialists (Messrs. James Miller and Thomas Dunning). Mr. James E. Gagliardo, the Region IV manager of the maintenance team inspection efforts will also accompany the team to assist in evaluating management control of maintenance activities.

The inspection team is scheduled to arrive on site on the morning of November 14, 1988, at approximately 7:30 a.m., and those who are not currently badged at the Arkansas Nuclear One site will require the appropriate site-specific training for unescorted access. The information for unescorted access will be provided in separate correspondence.

The inspection team would like to schedule an entrance interview at approximately 9:00 a.m. on November 14, 1988. The exit interview will be scheduled on December 2, 1988, at a time that is suitable to your staff and the inspection team. The team leader will debrief your staff regarding preliminary findings and concerns on a daily basis.
