Gentlemen:

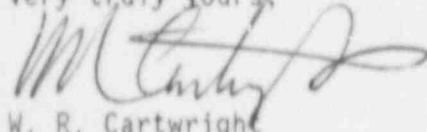

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNITS 1 AND 2
PROPOSED CHANGE TO TECHNICAL SPECIFICATIONS-SUPPLEMENT
CONTAINMENT INTEGRATED LEAKAGE TEST SCHEDULE

On September 20, 1988, we submitted a proposed change to the Technical Specifications regarding the containment integrated leakage test schedule. The cover letter transmitting the change, Serial No. 88-233, indicated that the proposed change was applicable to North Anna Power Station Unit 1. Attachments were provided illustrating the proposed change in the Technical Specifications, a discussion supporting the change, and the basis for a no significant hazards determination. However, the attachments discussed and applied to both Units 1 and 2.

The cover letter which addressed only Unit 1 was in error. Our intent is that the requested change be applicable to both units.

We regret any inconvenience caused as a result of this oversight.

Very truly yours,

W. R. Cartwright
Vice President - Nuclear
