Attention: Document Control Desk

Gentlemen:

SUBJECT: Grand Gulf Nuclear Station
Unit 1
Docket No. 50-416
License No. NPF-29
Annual Changes to SERI Operational
Quality Assurance Manual (OQAM) -
Topical Report
AECM-88/0119

Pursuant to 10CFR50.54(a)(3) and 10CFR50.71 System Energy Resources, Inc. (SERI) is preparing changes to the Operational Quality Assurance Manual (OQAM) for the annual submittal to the Nuclear Regulatory Commission (NRC). Due to a recent management assessment of SERI's Quality Programs (QP) department, we are in the process of a reorganization that will change certain responsibilities within QP as delineated in the OQAM. These changes will not reduce the commitments of the OQAM and are intended to improve the overall effectiveness of the QP organization.

Additional internal organization assessment results of other SERI departments are expected within the next few weeks. These results may also impact the organizational description in the OQAM and would require a second submittal to the NRC. Rather than make two submittals, SERI requests delaying the annual submittal until on or about September 1, 1988. This was discussed between G. A. Belisle of your staff and S. M. Feith of SERI on May 25, 1988.

Yours truly,

ODK:bms
