C. A. McNEILL, JR.

EXECUTIVE VICE PRESIDENT - NUCLEAR

September 12, 1988

Docket Nos. 50-277

50-278

Mr. William T. Russell
Administration, Region I
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555
ATTENTION: Document Control Desk

Reference: Letter from J. F. Paquette, Jr. to W. T. Russell
dated April 8, 1988

Dear Mr. Russell:

On April 8, 1988, when we transmitted Sections I and II of the Plan for Restart of Peach Bottom Atomic Power Station, Revision I, as well as a schedule of the major activities in the revised Plan, we indicated that we would update our schedule monthly, to enable PE and the NRC to monitor progress. Enclosed are fifteen (15) copies of our monthly schedule update. The solid line below each activity in the bar schedule is the original April 8, 1988 baseline schedule duration. The rectangular bar above the solid line represents the current forecast duration for each activity. The dark line within the rectangular bar represents current progress as of September 9, 1988.

As of September 9, 1988, 135 of 138 activities contained in Section I and II of the Restart Plan, or 98 percent, have been completed. We have reassessed end dates for the three activities not yet completed. Extensions for these dates are noted on pages three (3) and four (4) of the attached Section II Schedule. This should not change our projected restart schedule which is predicated on NRC approval in late November.

Similarly, on the graphs titled "Peach Bottom Executive Summary", the dates relating to completion of work on Unit 2 Modification completion are now shown as of 28 OCT 88. These activities are expected to be completed in time for required regulatory reviews and are not expected to change our projected restart schedule.
