Dear Mr. Bassett:

This letter is in follow-up to our telephone conversation today. As discussed, I will take the two year Re-qualification examination at the time that I change my Senior Reactor operator license from inactive to active status and complete the other requirements for reestablishing proficiency. This provision will be reflected in the training and re-qualification section of chapter twelve of the revised Safety Analysis Report that is currently in preparation as part of the power upgrade program. If there are any questions, please call me at 401-789-9391.

Sincerely,

Terry Tehan, Ph.D.
Director
