Subject: Allegations Received by NRC Involving Improper Documentation
of Health Physics Survey Results and Dumping of Contaminated
Resins on Boston Edison Property

Gentlemen:

In a January 26, 1988 conversation with Mr. N. Gannon of your staff, Mr. C. Warren, SRI, Pilgrim Station, discussed two allegations recently received by NRC. As discussed with Mr. Gannon the information we have received alleges that Health Physics survey results were changed to preclude having to perform additional surveys and that contaminated resins have been improperly disposed of on site.

Consistent with NRC policy in matters such as this, Boston Edison is requested to investigate these allegations and to provide a written response, within thirty (30) days of the date of this letter, documenting the results of the investigations into these matters and describing any corrective actions found warranted.

Thank you for your cooperation.

Sincerely,

Samuel J. Collins
Samuel J. Collins, Deputy Director
Division of Reactor Projects
