U.S. Nuclear Regulatory Commission Attention: Document Control Desk Washington, DC 20555

Gentlemen:

## Millstone Nuclear Power Station, Unit No, 2 Small Break LOCA Analysis TAC \#68360

In a leiter dated June 3,1988 , ${ }^{(1)}$ Northeast Nuclear Energy Company (NNECO) submitted to the NRC Staff a proposed schedule for various reports and analysis supportive of Millstone Unit No, 2's Cycle 10 reload. The Cycle 10 start-up is currently scheduled for March 1989.

In support of the proposed schedule, NNECO hereby submits, as Attachment 1 , the Small Break LOCA Ar ;iysis provided by Advanced Nuclear Fuels. This analysis was originall: scheduled to be submitted on October 21, 1988. However, due to concerns expressed by the Staff of potentially inadequate review time, NNECO has been successful in condensing our original schedule for this analysis package.

Please contact us if you have any questions regarding this information.
Very truly yours,
NORTHEAST NUCLEAR ENERGY COMPANY
