Nuclear Operations
P. O. Box 764 (167)
Columbia, SC 29218

Gentlemen:

SUBJECT: SYSTEMATIC ASSESSMENT OF LICENSEE PERFORMANCE, REPORT NO. 50-395/85-47

This refers to the NRC's Systematic Assessment of Licensee Performance (SALP) Board Report for your V. C. Summer facility which was sent to you on March 12, 1986; our meeting of March 18, 1986, at which we discussed this report; and your written comments dated April 21, 1986, relative to the report.

Your written reply emphasized and described in detail the measures and follow-up actions you have accomplished and are further planning to improve the functional areas rated as Category 3 by the Board, specifically Fire Protection and Plant Operations. A careful examination of these comments lead to our conclusion that your corrective action is plausible and, if continued, should lead to an improvement trend.

I have also concluded, based upon your written comments and my review, that information contained in the SALP Board Report regarding degradation of management controls and eddy current testing of the steam generator tubes was inaccurate. The SALP Board Report has been modified to reflect the correct information. These modifications are described in the attached Errata sheets. Corrected pages are included herein to update your copy of the SALP Board Report.

No reply to this letter is required; however, should you have any questions concerning these matters, I will be pleased to discuss them with you.

Sincerely,

Original Signed by
Roger D. Walker /for

J. Nelson Grace
Regional Administrator

Enclosure:
Appendix to SCE&G V. C. Summer
Plant SALP Board Report No.
