Attn: Jack E. Whitten  
Nuclear Materials Licensing Section  
611 Ryan Plaza Drive, Suite 1000  
Arlington, TX 76011

Gentlemen:

Enclosed is a copy of the by product material license renewal, with the changes requested by the letter dated Sept 17, 1987 Control No. 461445.

We hope we have answered your concerns on these four items. Two areas mentioned we had some questions about. The first is the statement about who is required to receive the model training program? We hope we answered as required.

The second area of question is What is considered proper experience in eluting Technetium 99m generator and kit prep? We are currently setting up a program with our Radiopharmacy to provide training for Dr. Parikh in Oklahoma City, Oklahoma.

If there are any questions please feel free to call on us (Victor Martin 405 355-8620 Ext. 3159 or Michael Morris 918 372-4222) or write to us at the above address.

Sincerely,

Ben White, Vice-President  
Comanche County Memorial Hospital
