Re: 10CFR50.90

U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, DC 20555

Gentlemen:

Millstone Nuclear Power Station, Unit No. 2  
Cycle 10 Safety Analysis Report (TAC #68360)

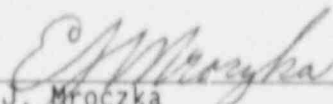

In a letter dated June 3, 1988<sup>(1)</sup>, Northeast Nuclear Energy Company (NNECO) submitted to the NRC Staff a proposed schedule for various reports and analysis supportive of Millstone Unit No. 2's Cycle 10 reload. The Cycle 10 start-up is currently scheduled for March 1989.

In support of the proposed schedule, NNECO hereby submits, as Attachment 1, Millstone Unit No. 2 Cycle 10 Safety Analysis Report provided by Advanced Nuclear Fuels. This report was originally scheduled to be submitted concurrently with the proposed license amendment on November 15, 1988. However, due to concerns expressed by the Staff of potentially inadequate review time, NNECO has been successful in condensing our original schedule for this report package.

Please contact us if you have any questions regarding this information.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
