

JUN 15 1988

Florida Power and Light Company
ATTN: Mr. W. F. Conway
Senior Vice President - Nuclear
P. O. Box 14000
Juno Beach, FL 33408-0420

Gentlemen:

SUBJECT: DOCKET NOS. 50-250 AND 50-251

This acknowledges the receipt of your letter of April 11, 1988, which transmitted Revision 13 to the Turkey Point Physical Security Plan.

Our review of the changes has found most of them to be consistent with the provisions of 10 CFR 50.54(p). Accordingly, they are acceptable for inclusion into the plan. A couple of changes require further clarification and a violation will be issued during the next physical security inspection for failing to report one of the changes within 60 days as required by 10 CFR 50.54(p)(2).

These concerns were discussed on May 20, 1988, with Ms. S. Ferrell of your staff and Ms. C. Perny of this office. A brief summary of the concerns are stated in the enclosure to this letter. It is our understanding that Revision 14 will adequately address these concerns and is currently being prepared.

The enclosure to your letter is being withheld from public disclosure because it contains Safeguards Information and must be protected in accordance with the provisions of 10 CFR Part 73.21.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

William E. Cline, Chief
Nuclear Materials Safety and
Safeguards Branch
Division of Radiation Safety
and Safeguards

ENCLOSURE

Inconsistent Changes

<u>Section</u>	<u>Page</u>	<u>Comment</u>
2.2.2.	2-3	This section needs to be clarified to eliminate the contradiction with Section 2.2.1.1 relative to the performance of access control duties by unarmed security force members.
3.2.2.7	3-12	The exemption of Q.A. items from search requirements needs further clarification. The outer shipping container must be opened. Hermetically sealed and machine sealed materials do not need to have their seals removed. The plan needs to clearly differentiate between sealed for shipping, which must be opened, and sealed for environmental, quality or integrity reasons.
Appendix C	CEB 1-2	<p>This change describes modifications and associated compensatory measures for the contractor entry building. The plan states that the changes were made December 28, 1987. The changes were not reported to the NRC until April 11, 1988, thereby failing to meet the reporting requirement of two months as stated in 10 CFR 50.54(p)(2).</p> <p>Discussions with FP&L licensing and site management attributed the failure to an ownership problem between corporate and site staffs.</p>
