Docket No. 50-142

UCLA Security Plan

We have reviewed your revision dated 6/20/75 to the physical security plan for the Nuclear Energy Laboratory at UCLA. At Section D.1. of the plan you state that only one member of the UCLA Police Department will immediately respond to an intrusion alarm and that additional personnel would be available to respond if needed. Your previous plan, dated 8/21/74, stated that at least two members of the security force would immediately respond. We find this change tends to decrease the effectiveness of the security plan for the facility. No explanation is offered for the change, and it appears that no compensating security measures have been provided. We request, therefore, that you provide justification for this proposed change or revise your plan to reflect the previously approved level of protection.
