Division of Reactor Safety and Projects  
Palo Verde Nuclear Generating Station (PVNGS)  
Unit 3  
Docket No. 50/530

Subject: Time Extension For Report - DER 86-11  
A 50.55(e) Potentially Reportable Deficiency Relating to  
Skinner Solenoid Valves

File: 86-006-216; 86-056-026; D.4.33.2

Reference: (A) Telephone Conversation between R. C. Sorenson and D. R. Larkin  
on March 14, 1986 (Initial Reportability - DER 86-11)  
(B) ANPP-36087, dated April 14, 1986 (Interim Report - DER 86-11)

Dear Sir:

The NRC was notified of a Potentially Reportable Deficiency in Reference (A) and an Interim Report was issued by Reference (B). At that time it was estimated that a Final Report would be available by May 16, 1986.

Due to review comments indicating the need for additional investigation and evaluation of the transportability and root cause, it is now expected that this information will be finalized by June 2, 1986, at which time a complete report will be submitted.

There is no new information or change to the Interim Report at this time.

Very truly yours,

E. E. Van Brunt, Jr.  
Executive Vice President  
Project Director
