Hi James,

We met this afternoon and are pleased with the wording below with the one edit as noted below. Please let me know if this is acceptable.

Thanks,
Amaryl

Subject: EXTERNAL: RE: NFS Unplanned Contamination RAIs

Hi Amaryl,

We're working on the SNM-124 license amendment to grant the exemption to 70.50(b)(1). Based on NMSS management feedback for similar exemptions, the license condition is slightly different than what was requested. The draft condition reads:

Notwithstanding the requirements of 10 CFR 70.50(b)(1), the licensee is exempted from the requirement to report unplanned contamination events when the following conditions are met:

- (a) The event occurs in a restricted area in a building **surrounded by a fenced area** which is maintained inaccessible to the public by multiple access controls;
- (b) The area was controlled for contamination before the event occurred, the release of radioactive material is under control, and no contamination has spread outside the area;
- (c) Radiation safety personnel trained in contamination control are readily available;
- (d) Equipment and facilities that may be needed for contamination control are readily available; and
- (e) The otherwise reportable unplanned contamination event is documented in the licensee's Corrective Action Program.

Please confirm that NFS has no objection to the draft language.

Thanks,

James

Subject: [External_Sender] NFS Unplanned Contamination RAls

Hi James,

Please find attached NFS' response to the NRC's Unplanned Contamination Request for Additional Information. Please let me know if you have any questions.

Thanks,
Amaryl
