

DSAR-15.1

License Renewal Supplement

Introduction

Rev 0

Safety Classification:

Safety

Usage Level:

Information

Change No.:	EC 69283
Reason for Change:	This section is being updated to reflect the permanent cessation of operations of Fort Calhoun Station. The contents of this section have been changed to remove any information which is not applicable during decommissioning.
Preparer:	Kristen Jacobsen

15. **LICENSE RENEWAL SUPPLEMENT**

15.1 Introduction

The application for a renewed operating license is required by 10 CFR 54.21(d) to include "an FSAR Supplement." This section provides that supplement for the FCS Defueled Safety Analysis Report (DSAR). [Section 15.2](#) contains a summarized description of the programs and activities for managing the effects of aging. [Section 15.4](#) summarizes commitments to provide aging management programs to manage aging effects of structures and components prior to the period of extended operation, as well as other information.
