June 26, 2020

Haas & Associates, Inc. ATTN: Sandor Manyoky Radiation Safety Officer PO Box 110776 Anchorage, AK 99511

SUBJECT: HAAS & ASSOCIATES, 030-38211, LICENSE RENEWAL WARNING LETTER

Mr. Manyoky:

This refers to our letter dated June 9, 2020, (Agencywide Document and Access Management System [ADAMS] Accession No. ML20177A724) a copy of which is enclosed, which requested information about your application, dated January 10, 2020, for renewal of NRC License No. 50-29374-01. As of this date, we have not received a reply from you.

As specified in 10 CFR 30.37, your application for renewal of a specific license must be filed on NRC Form 313 and in accordance with 10 CFR 30.32. Title 10 CFR 30.32 states, in part, that information contained in previous applications filed with the Commission may be incorporated by reference, provided that the reference is clear and specific. Further, 10 CFR 30.33 requires the applicant's proposed equipment and facilities to be adequate to protect health and minimize danger to life or property.

However, the information you submitted on your NRC Form 313, dated January 10, 2020, provided information that differed as to the authorized location on your license (and previous application) and provided no information by which to assess the adequacy of the planned storage location, such as a facility diagram. As we cannot confirm the adequacy of your facility without this information, we are unable to proceed.

We have made numerous attempts to attain this information, including multiple phone calls, emails, and two letters. If we do not receive your reply within fourteen (14) calendar days from the date of this letter, it will be necessary to deny your application for license renewal and to terminate your license.

While the action of allowing your license to expire would normally require you to divest yourself of all licensed material in your possession, based on our discussions with you and the gauge manufacturer, we understand that the devices are no longer in your possession. Further, the manufacturer provided leak test results confirming that the sources were intact at the time of divestiture. Therefore, there is no basis to extend the license expiration date to allow time for divestiture.

## S. Manyoky

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <u>www.nrc.gov/reading-rm/adams.html</u>.

Sincerely,

Heather J. Gepford, Ph.D., CHP, Chief Materials Licensing & Decommissioning Branch

SUBJECT: LICENSE RENEWAL

I am reviewing the license renewal application for Haas & Associates and there are a few items I need to follow up with you on. I cannot process the license renewal until I receive the following Information.

- 1. Please re-submit your NRC Form 313 with the following changes.
  - The form needs to include the name of the licensee as it appears on your license instead of your name in Box #2.
  - If you plan to use licensed materials at temporary job sites, please ensure that the phrase "Temporary Job Sites" is included in Box #3.
- 2. Please complete the attached NUREG 1556, Volume 1, Appendix B.

If you have any questions or concerns, please contact me at 817-200-1546, or casey.alidredge@nrc.gov. In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS).
