Subject: RE: Request for additional information for NRC License No. 21-25931-01

Dear Mr. McConahy:

You request one sources of Gamma Industries, Inc. Model NB for use in well logging tools. However, based on the Sealed Source and Device Registry (SSDR) No. NR-300-S-856-S for the source, Model NB should be used for moisture/density gauge devices and Model NB (HP) is used for well logging tools. Please clarify if you would like the authorization for NB (HP) for use in well logging tools or else.

Thank you,

Frank Tran
