General Comment

President Trump has said more than once that Covid-19 posed no significant hazards.

"We have it totally under control... We pretty much shut it down... We're in very good shape... It's going to work out fine... The risk to the American people remains very low... It's going to disappear... It'll go away... It will go away, just stay calm... It's something we have tremendous control of... Stay calm, it will go away... It may not come back at all... It's gonna go, it's gonna leave, it's gonna be gone, it's gonna be eradicated... With or without a vaccine it's going to pass... This virus is going to disappear... This is going to go away without a vaccine... At some point it will go away... It goes away... It's going to fade away... It's dying out..." - President Trump

Let's fact check that. Over 125,000 Americans have died from Covid-19, and hundreds more are dying every day. This sounds like a significant hazard to me.
