Subject: NMA Comment Letter

Dear Ms. Sweeney,

Thank you for your June 12, 2020 letter regarding whether NRC should resume rulemaking to amend its regulations governing the domestic licensing of source material by codifying general requirements to address groundwater protection at uranium in situ recovery facilities. As you are aware, the Commission has not yet provided staff with direction on this potential rulemaking. To ensure that your comments are considered, your letter will be added to regulation.gov under NRC docket NRC-2008-0421. Please let me know if you have any questions.

Kind regards,

John

John R. Tappert, P.E.
