Subject: [External_Sender] We need NRC GEIS for US leadership

I am writing in support of the U.S. Nuclear Regulatory Commission's proposal to produce a generic environmental impact statement (GEIS) for small-scale advanced nuclear reactors. This action directly supports the NRC's primary mission to protect the public health and safety, by ensuring that clean, emission-free power plants can be effectively evaluated and brought online. Without expedited US entrepreneurial leadership in gen IV reactors, Russia and China will continue to dominate international markets with suspect technology and coercive deals. Our national interests are at stake.

Sincerely,

Zach Hills
