Subject: [External_Sender] Approval of the generic environmental impact statement (GEIS) for small-scale advanced nuclear reactors

Re: Approval of the generic environmental impact statement (GEIS) for small-scale advanced nuclear reactors

Dear Nuclear Regulatory Commission,

Producing abundant zero carbon energy is vital to the future survival of our civilization. To that end we must be able to operate nuclear power plants in a safe manner, but also deploy them faster and at greater scale. GEIS will enable this by scaling up the regulatory process for smaller reactors that have a known, concomitantly small environmental impact. Thank you for considering this necessary and beneficial regulatory change.

Sincerely,
Greg BArton
