**Subject:** [External\_Sender] GEIS for Oklo reactor

To Whom It May Concern:

I am writing in support of the U.S. Nuclear Regulatory Commission's proposal to produce a generic environmental impact statement (GEIS) for small-scale advanced nuclear reactors like the Oklo microreactor. I have been made aware of what appears to be an organized effort to oppose the GEIS on political grounds, so I wanted to take the time to voice my support of it. Microreactors are a promising technology that deserve appropriate attention from the NRC, and the regulatory process should not be undermined by uninformed political groups. I have full faith that the NRC will appropriately carry out its duties in this matter.

Best regards,

Jeremy King

PhD student, nuclear engineering, Texas A&M University
