[DOE-LM UMRCA Inspection-Sampling Schedule FY 2020 \(TA 103\) May.docx](#)

Hello Nick-

Following up on your request from March 23, for LM to keep NRC informed regarding our inspection schedules for the Title I and Title II sites, at this time we do not anticipate any COVID related impacts to the annual site inspections for Title I and Title II sites, other than delays in the planned dates for the inspections. We anticipate that all inspections planned for calendar year 2020 will be completed by the end of the calendar year, per the attached Word document, which contains our site-wise schedule.

Partial impacts to planned monitoring events at two Title I sites will occur due to COVID related travel restrictions, as follows:

- At Shiprock, NM the semi-annual groundwater and surface water monitoring, which was scheduled for March 2020, will not be conducted. The next monitoring event at Shiprock is planned for September 2020.
- At Gunnison, CO the annual monitoring event will be limited and follow a risk-based sampling approach, which will include sampling of 5 domestic wells and 6 surface water locations. Sampling of the 28 monitoring wells will be omitted.

If we suffer any new impacts to the schedule, I will let you know as soon as possible; otherwise, please contact me directly if you have questions, concerns, or need to chat.
