NRC Senior Resident Inspector Newly Assigned to Limerick Nuclear Power Plant

Nuclear Regulatory Commission officials in King of Prussia, Pa., have selected Adam Ziedonis as the new senior resident inspector at the Limerick Generating Station. The two-unit site is operated by Exelon Nuclear and is located in Limerick, Pa.

Ziedonis joins NRC Resident Inspector Sherlyn Haney at Limerick.

Most recently, Ziedonis was the senior resident inspector at the Hope Creek Generating Station in Hancocks Bridge, N.J. He has also been a resident inspector at the Salem nuclear power plant in Hancocks Bridge, N.J., and the Peach Bottom Atomic Power Station in Delta, Pa., and a region-based reactor inspector.

Ziedonis joined the agency's Region I office in 2004 after earning his bachelor's and master's degrees in mechanical engineering from Drexel University in Philadelphia. He is a graduate of the NRC's Nuclear Safety Professional Development Program and a registered Professional Engineer in the Commonwealth of Pennsylvania.

Each U.S. commercial nuclear power plant has at least two NRC resident inspectors who serve as the agency's eyes and ears at the facility, conducting inspections, monitoring major work projects and interacting with plant workers and the public. Resident inspectors are assigned to a site for up to seven years.
