Docket Nos. 50-443-OL  
50-444-OL  
Off-site Emergency  
Planning Issues

APPLICANTS' MOTION FOR SUMMARY  
DISPOSITION OF KENSINGTON CONTENTION  
NO. 7 AND NECNP CONTENTION NO. RERP-12

Pursuant to 10 CFR § 2.749, on the basis of the Affidavit of William T. Wallace re Kensington Contention No. 7 and NECNP Contention RERP-12 and the undisputed facts set forth in the attachment hereto, and for the reasons set forth below, the applicants move the Board to enter a decision summarily disposing of Kensington Contention No. 7 and NECNP Contention No. RERP-12 in applicants' favor.

REASONS FOR GRANTING  
THE MOTION

Kensington Contention No. 7 as submitted read as follows:

"The December 1985 draft radiological emergency response plan for the Town of Kensington does not provide reasonable

assurance that adequate protective actions have been developed for emergency workers and the public, as required by 10 CFR § 50.47(b)(10), because there are no provisions for the use of radioprotective drugs or respiratory equipment for emergency workers and institutionalized persons within the plume exposure."

This Board's ruling on the contention was to admit the contention but limited "to emergency workers and institutionalized persons." Memorandum and Order (April 29, 1986) at 20.

NECNP's Contention RERP-12 as submitted read:

"The New Hampshire RERP does not provide for radioprotective drugs for institutionalized persons within the EPZ, as required by NUREG-0654, § II.J.10.e. Nor does it consider the circumstances under which radioprotective drugs should be administered to the general public, as required by § II.J.10.f."

This too was "admitted as limited only to provision of radioprotective drugs for institutionalized persons and emergency workers within the EPZ" (emphasis in original). Memorandum and Order (April 29, 1986) at 62.

The affidavit of William T. Wallace filed herewith makes clear that the New Hampshire Radiological Emergency Response Plan has been revised to fully provide for predistribution and administration as necessary of radioprotective drugs to emergency workers and institutionalized persons and sets out procedures for decisionmaking and administration of drugs. This brings the plan into full compliance with the

evaluation criteria set out in NUREG-0654 § J.10.e and  
§ J.10.f.

By their attorneys,

STATEMENTS OF MATERIAL FACTS AS  
TO WHICH THERE IS NO DISPUTE

1. Revised § 2.7.3 of the New Hampshire Radiological Emergency Response Plan (NHRERP) provides for the predistribution and administration of radioprotective drugs (potassium iodide) to emergency workers and (with concurrence of attending physicians) to institutionalized persons (and their necessary attendants).

2. New Hampshire Department of Public Health Services Procedures establish the decision criteria and administrative mechanics for authorizing administration of potassium iodide.
