Houston Lighting & Power Company
ATTN: J. H. Goldberg, Group Vice
President, Nuclear
P.O. Box 1700
Houston, Texas 77001

Gentlemen:

This refers to the inspection conducted by Mr. R. B. Vickrey of this office during the period April 18-22 and May 2-6, 1988, of activities authorized by NRC Operating License NPF-76 and Construction Permit CPPR 129 for the South Texas Project, Units 1 and 2, and to the discussion of our findings with Mr. J. S. Phelps and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included selected safety-related electrical components and systems, safety-related instrument components and systems, and actions on previously identified findings. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspector. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 4 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
L. J. Callan

L. J. Callan, Director
Division of Reactor Projects
