Re: University of Florida SPERT Assembly (UFSA) Facility
Special Nuclear Material License 1050 - Docket No. 70-1068
Updated Physical Security Plan

Gentlemen:

The enclosed package contains Revision 2 for the Physical Security Plan for the University of Florida SPERT Assembly which was originally submitted and dated August 14, 1981. These revisions, dated June, 1988 are submitted as a result of SNM-1050, Amendment No. 10 dated April 5, 1988 which authorized movement of the SPERT fuel for nondestructive testing purposes (not yet performed) and change of the storage location of the SPERT fuel (completed).

Text changes in the Plan are extensive in many cases so no special indication is given to text revisions. The Plan is retyped and submitted in accordance with 10 CFR 50.54(p). In accordance with 10 CFR 50.54(p), there is no decrease in the effectiveness of the Plan per previous reviews by staff members and our safety review committee.

The complete enclosure consists of a signed original and three copies of this letter plus four copies of the revised body of the Physical Security Plan.

Sincerely,

Paul M. Whaley
Acting Reactor Manager for
William G. Vernetson
Director of Nuclear Facilities
