Secretary of the Commission
Attn: Doctrining and Service Branch
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir,

I would like to express my strong support for the proposed new rule that would clarify the requirements new nuclear power plants must meet before low-power testing is conducted. Everything possible should be done to move these plants to full utilization. It is disgraceful that in the U.S. it seems to take at least 10 years to complete a plant while in Europe they can do it in $\frac{1}{2}$ the time. I have no doubt that in the not-too-distant future New England will be suffering a severe power shortage. The dismantling of Shoreham is a national disgrace and a horrible waste of national assets. Again please do whatever is necessary to move completion along.

Sincerely,

Andrew A. Gillen
Manchester, Ind
