

AUG 06 1986

MEMORANDUM FOR: J. P. Jaudon, Chief, Projects Section A, Reactor Projects Branch  
FROM: R. A. Cooley, Chief, Operator Licensing Section, Reactor Safety Branch  
SUBJECT: SALP INPUT FOR COOPER NUCLEAR STATION

During the SALP period February 1, 1985 to July 31, 1986, the Operator Licensing Section administered three sets of Replacement exams and one set of Requalification exams. The results are shown below for replacement exams:

<u>Date</u>	<u>RO</u>	<u>Passed</u>	<u>Failed</u>
June 1985	$\frac{7}{7}$	$\frac{7}{7}$	$\frac{0}{0}$
	$\frac{SRO}{1}$	1	0
March 1986	$\frac{RO}{7}$	4	3
	$\frac{SRO}{4}$	4	0
June 1986	$\frac{RO}{2}$	2	0

The requalification examinations that were administered in September of 1985 found the Requal Program to be satisfactory.

Comparing the results of this SALP period with the last, Cooper Nuclear Station has made a noticeable improvement in their training programs.

If you need additional information concerning operator licensing activities at Cooper, please contact D. Graves (860-8168) or myself (860-8147).
