South Texas Project Electric Generating Station
Unit 2
Docket No. 50-499
NRC Bulletin 88-05 and Supplements 1 and 2 Response Update

The South Texas Project Electric Generating Station (STPEGS) has completed the additional chemical and mechanical testing described in our letter of November 1, 1988.

The results of that testing do not alter our original conclusion that the material installed in STPEGS, Unit 2 is acceptable for use in safety-related ASME Code applications.

Attachment A, Revision 1, dated November 15, 1988, incorporates the additional test results and evaluation. The revisions are indicated by vertical bars.

If you have any questions, please contact J. N. Bailey at (512) 972-8663 or T. J. Jordan at (512) 972-7902.

J. H. Goldberg
