

JUN 16 1988

Docket No. 50-219

LICENSEE: GPU Nuclear Corporation  
Jersey Central Power and Light Company

SUBJECT: MAY 26, 1988 MEETING WITH GPU NUCLEAR  
CORPORATION (GPUN) TO DISCUSS MATTERS RELATED  
TO THE OYSTER CREEK-12R OUTAGE IGSCC INSPECTION  
STRESS IMPROVEMENT PLANS

On Thursday, May 26, 1988, a meeting was held at NRC, White Flint North, Rockville, Maryland with the licensee to discuss matters related to the Oyster Creek-12R Outage IGSCC Inspection/Stress Improvement Plans as described in the licensee's letters dated February 16, 1988 and April 5, 1988. Attachment 1 is the list of individuals participating in the discussion.

Attachment 2 is the licensee's agenda. The following is a summary of the significant items discussed.

The licensee presented their plans and indicated that they (1) plan to inspect at least 20% of welds not previously inspected in 10R or 11R refueling outages (2) will reinspect 10% of welds previously inspected which occur in systems where all welds have received at least one inspection in 10R and/or 11R, (3) GPUN is satisfied with Adequacy of 82-03 inspection, (4) good water chemistry in cycles 10 and 11 significantly reduces potential for new cracks and growth rate of existing cracks (5) inspection of 100% welds and stress improvement is justifiable for small diameter piping, and the inspection plan is adequate to determine if major IGSCC problems exist at Oyster Creek.

The staff indicated that we will review the information presented in GPUN's letters of February 16, 1988; April 5, 1988, and Attachment 2 of this meeting summary and will advise them of our position regarding this matter.

**"ORIGINAL SIGNED COPY"**

Alexander W. Dromerick, Project Manager  
Project Directorate I-4  
Division of Reactor Projects I/II
