Washington, D. C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)
DOCKET NOS. 50-445 AND 50-446
NRC BULLETIN 88-04: POTENTIAL SAFETY-RELATED PUMP LOSS

REF: W. G. Council Letter TXX-88556 to NRC dated July 8, 1988

Gentlemen:

The referenced letter provided TU Electric's initial response to six action items in NRC Bulletin 88-04, "Potential Safety-Related Pump Loss." In that letter, we indicated our evaluation of the identified safety-related systems and pumps for Unit 1 and Common would be completed by December 1, 1988. This evaluation will take longer than previously anticipated. Consequently, the current schedule for completion of the Unit 1 and Common evaluation is February 13, 1989. The Unit 2 evaluation is still scheduled to be completed prior to Unit 2 fuel load. TU Electric will provide a written response describing the actions taken within 30 days of completion of the above evaluations.

Very truly yours,

A handwritten signature in cursive script, appearing to read 'W. G. Council'.
