

UNITED STATES NUCLEAR REGULATORY COMMISSION

VIRGINIA ELECTRIC AND POWER COMPANY

DOCKET NOS. 50-338 AND 50-339

NOTICE OF WITHDRAWAL OF APPLICATION FOR

AMENDMENT TO FACILITY OPERATING LICENSE

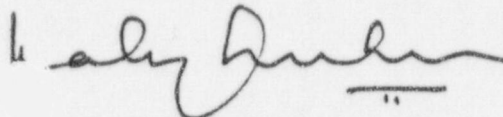

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Virginia Electric and Power Company (the licensee) to withdraw its March 21, 1996, application for proposed amendments to Facility Operating License Nos. NPF-4 and NPF-7 for the North Anna Power Station, Unit Nos. 1 and 2, located in Louisa County, Virginia.

The proposed amendments would have clarified the requirements for testing charcoal adsorbent in the Waste Gas Charcoal Filter System, the Control Room Emergency Habitability System, and the Safeguards Area Ventilation System.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the FEDERAL REGISTER on April 24, 1996 (61 FR 18175). However, by letter dated November 23, 1998, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated March 21, 1996, and the licensee's letter dated November 23, 1998, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at The Alderman Library, Special Collections Department, University of Virginia, Charlottesville, Virginia 22903-2498. Dated at Rockville, Maryland, this 25th day of November 1998.

FOR THE NUCLEAR REGULATORY COMMISSION

A handwritten signature in black ink, appearing to read 'Nagaswaran Kalyanam', with a horizontal line underneath the name.

Nagaswaran Kalyanam, Project Manager  
Project Directorate II-2  
Division of Reactor Projects - I/II  
Office of Nuclear Reactor Regulation
